

FIG. 1 is a schematic diagram of a system 100 for providing audio feedback to a user. The system 100 includes a user interface 102, a processor 104, and a speaker 106. The user interface 102 is a display device that displays a plurality of positions 1-8. The processor 104 is connected to the user interface 102 and the speaker 106. The processor 104 receives input from the user interface 102 and outputs audio signals to the speaker 106. The speaker 106 provides audio feedback to the user based on the input received from the user interface 102.

FIG. 13 is a perspective view of the device 100 in a closed position, showing the housing 300 and the cover 400. The device 100 is shown in a perspective view, and the housing 300 and the cover 400 are shown in a perspective view. The device 100 is shown in a perspective view, and the housing 300 and the cover 400 are shown in a perspective view.
